1. Question: Is there lightning protection on the roofs now?

**Answer:** The "A" and "C" roof did but it was removed as some point. The connection points are still there for them to connect to but there are no lightning rods or conductors in place. The "B" didn't have it because it wasn't necessary.

**2. Request:** Procure a copy of the structural roof plans for the areas of new work...this is needed to better understand the required roof slopes and Insulation

Response: See attached drawings:

ZME Wall Sections ZME Roof Plan A, B, C ZME Roof Plan Original

These are drawings indicate the roofs and slopes. The roofs have been re-roofed in the interim so the roof systems have changed from the original systems shown here. The structure has not changed. Note that original insulation design was for 2" of insulation.
